The following is an examiner's statement of reasons for allowance: DE 4020914 discloses a method for decomposing ammonia in the presence of a catalyst comprising a mixture of a noble metal, which may be iridium, and molybdenum oxide or vanadium oxide. However DE 4020914 does not teach, disclose or suggest that the catalyst should be present on a silicate carrier having the formula as recited in claims 1-4, or that the vanadium and/or molybdenum should be present in the elemental state, rather than as the oxide, as required by claims 6 and 7. Nor would there be any motivation from the prior art to modify the catalyst of DE 4020914 in the manner recited in claims 1-4, 6 and 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication should be directed to Wayne A. Langel at telephone number 571-272-1353.
